

Summary by country

COUNTRY

Table 7 summarizes the distribution of languages and their populations within the countries of the world. The *Count* column gives the total count of living languages used as a first language in that country, and *Percent* translates that to a percentage of all living languages in the world. Unlike the preceding tables, this table counts all languages regardless of their area of origin. Therefore, no grand totals are given for these columns since the same language can be counted as being used in multiple countries. The next two columns break the language count into *Established* languages versus *Immigrant* languages. The next three columns summarize populations: *Total* gives the total number of first-language speakers in that country for all languages for which population figures are known, *Mean* gives the average size of those language groups for which population figures are known, and *Median* gives the middle size of a language group (that is, half are larger and half are smaller). The last two columns are explained in the next paragraph.

Table 8 repeats the information in table 7 but presents the countries of the world in order of their linguistic diversity, from most diverse to least diverse. The *Index* column reports Greenberg's diversity index. This is the probability that any two people of the country selected at random would have different mother tongues (Liebersson 1981). The highest possible value, 1, indicates total diversity (that is, no two people have the same mother tongue) while the lowest possible value, 0, indicates no diversity at all (that is, everyone has the same mother tongue). The computation of the diversity index is based on the population of each language as a proportion of the total population. The *Coverage* column indicates the completeness of the computation by reporting the percentage of languages in the country for which population estimates are available.

Table 7. Distribution of living languages in the world by country

Country	Living languages		Number of speakers					Diversity	
	<i>Count</i>	<i>Percent</i>	<i>Established</i>	<i>Immigrant</i>	<i>Total</i>	<i>Mean</i>	<i>Median</i>	<i>Index</i>	<i>Coverage</i>
